Introduction

Consultant Journey

- Maven
- Eclipse
- MySQL on GCP
- Junit
- Mockito
- Progress Tracking

CI

GitHub
Different Feature Branches
-Customer
-Item
-Order
-Dev
-Started with, a commit per class
-Later changed, slight regret

Testing

- Test Driven Development
- Testing done first before moving onto next feature
- Progress Tracking

Element	Coverage	Covered Instructions	Missed Instructions	Total Instructions	
∨ 🗂 ims-demo	66.9 %	3,346	1,653	4,999	
› 📁 src/main/java	48.8 %	1,468	1,543	3,011	
› 📁 src/test/java	94.5 %	1,878	110	1,988	

Demonstration

Sprint Review

Sprint Retrospective

▶ Read Requirements more Before Writing User Stories

▶ Split into clear sections

▶ Learn how to do X must be finished before Y

Conclusion

Started Well
Broke down towards the end
Less confidence and towardness
Speak to group and training members more
Take more advantage of trainers even if confident
Think of better questions and flaws to process
Think and ask for ways to approach parts not
done yet
Could have been a lot better
Faith it will be better
Make this personal project and way to monitor
growth

Questions
